The Company believes that non-GAAP financial measures provide investors with useful supplemental information about the financial performance of our business, enables comparison of financial results between periods where certain items may vary independent of business performance, and allow for greater transparency with respect to key metrics used by management in operating and analyzing our business.

(1) In the third quarter of 2016, the Company adopted Accounting Standards Update ("ASU") 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. This guidance required us to reflect any adjustments as of January 1, 2016, the beginning of the annual period that includes the interim period of adoption. The primary impact of adoption was the recognition of excess tax benefits and tax deficiencies in our provision for income taxes rather than additional paid-in capital and the election to account for forfeitures as they occur, rather than estimate expected forfeitures. This resulted in a decrease to our provision for income taxes of \$2 million during the three months ended March 31, 2016 and June 30, 2016, respectively and an increase to stock-based compensation expense of approximately \$1 million during the three months ended March 31, 2016.

(2) Represents a \$67 million non-cash charitable contribution to the TripAdvisor Charitable Foundation which was settled in company stock and therefore excluded for non-GAAP purposes. This amount also includes charitable contributions to the TripAdvisor Charitable Foundation of which \$6 million was accrued ratably during the nine months ended September 30, 2015 (approximately \$2 million per quarter) under GAAP with the intention of settling in cash and then reclassified as non-GAAP during Q4 2015 to reflect the non-cash nature of the final settlement.

(3) Depreciation. Includes internal use software and website development amortization.

(4) Adjusted EBITDA. A non-GAAP measure which is defined as net income (loss) plus: (i) provision for income taxes; (ii) other income (expense), net; (iii) depreciation of property and equipment, including amortization of internal use software and website development; (iv) amortization of intangible assets; (iv) stock-based compensation and other stock-settled obligations; (v) goodwill, long-lived asset and intangible asset impairments; and (viii) other non-recurring expenses and income. These items are excluded from our Adjusted EBITDA is our segment profit measure and a key measure used by our management and board of directors to understand and evaluate the operating periods less meaningful. Adjusted EBITDA, the exclusion of certain expenses in calculating Adjusted EBITDA can provide useful measure for period -to-period comparisons of our core business. Accordingly, we believe that Adjusted EBITDA provides useful information to investors and others in understanding and evaluating our operating results in the same manner as our management and board of directors and allows for another useful comparison of our performance with our prior periods.

(5) Income Tax Effect of Non-GAAP Adjustments. The non-GAAP adjustments described are reported on a pre-tax basis. The income tax effect on non-GAAP adjustments was calculated based on the individual impact that these items had on our GAAP consolidated income tax expense for the periods presented.

(6) Non-GAAP Net Income. Defined as GAAP net income excluding, net of their related tax effects: : (1) stock-based compensation expense and other stock-settled obligations; (2) amortization of intangible assets; (3) goodwill, intangible assets, and other long-lived asset impairments; and (4) certain gains, losses, and other non-recurring income or expenses that we do not believe are indicative of our ongoing operating results. We believe non-GAAP net income is an operating performance measure which provides investors and analysts with useful supplemental information about the financial performance of our business, as it incorporates our unaudited consolidated statement of operations, taking into account depreciation, which management believes is an ongoing cost of doing business, but excluding the impact of certain expenses, infrequently occurring items and items not directly tied to the core operations of our businesses, and also enables comparison of financial results between periods where certain items may vary independent of business performance.

(7) Non-GAAP Diluted EPS. Defined as non-GAAP net income divided by GAAP diluted shares. We believe non-GAAP EPS is useful to investors because it represents, on a per share basis, our unaudited condensed consolidated statement of operations, taking into account depreciation, which we believe is an ongoing cost of doing business, as well as other items which are not allocated to the operating businesses such as interest expense, interest income, income taxes and foreign exchange gains or losses, but excluding the effects of certain expenses not directly tied to the core operations of our businesses. During the second quarter of 2016, the Company began calculation gnon-GAAP net income per diluted share sate added shares determined under the treasury stock method. All historical periods have been conformed to the current calculations in prior periods.

(8) Foreign Exchange Impact. Calculated on a constant currency basis by excluding the effects of foreign exchange on revenue and expenses by translating actual revenue and expenses for the current year three months ended using the prior period exchange rates. We believe this is a useful measure that facilitates management's internal comparison to our historical performance because it excludes the effects of foreign currency volatility that is not indicative of our core operating results.

(9) In the third quarter of 2016, the Company adopted Accounting Standards Update ("ASU") 2016-09, Compensation – Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, which eliminated the requirement to reclassify excess tax benefits related to stock-based compensation from operating to financing activities and a corresponding increase in cash flows. The retrospective application to prior periods resulted in an increase in cash flows provided by operating activities and a corresponding increase in cash flows. The retrospective application to prior periods resulted in an increase in cash flow provided by operating activities and a corresponding increase in cash flows. The retrospective application to prior periods resulted in an increase in cash flows provided by operating activities and a corresponding increase in free cash flows.

(10) Free Cash Flow. A non-GAAP measure which is defined as net cash provided by operating activities less capital expenditures, which are purchases of property and equipment, including capitalization of internal-use software development costs. We believe this financial measure can provide useful supplemental information to help investors better understand underlying trends in our business, as it represents the operating activities. Free Cash Flow hat our operating businesses generate, less capital expenditures but before taking into account other cash movements that are not directly tied to the core operations of our businesses, such as financing activities, foreign exchange or certain investing activities. Free Cash Flow has certain limitations in that it does not represent the total increase or decrease in the cash balan ce for the period, nor does it represent the total increase or decrease in the cash balan ce for the period, nor does it represent the total increase of cash flows.

(11) The Company does not calculate or report net income by segment.

(12) Adjusted EBITDA Margin by Segment. Defined as Segment Adjusted EBITDA divided by Segment Revenue.

(13) Unique Visitors. Total traffic growth, or growth in monthly visits from unique visitors, is reflective of our overall brand growth. Additionally, we track and analyze sub-segments of our traffic and their correlation to revenue generation and utilize data regarding hotel sh oppers as a key indicator of revenue growth.

(14) Hotel Shoppers. The term "hotel shoppers" refers to visitors who view either a listing of hotels in a city or a specific hotel page. The number of hotel shoppers tends to vary based on seasonality of the travel industry and general economic conditions, as well as other factors outside of our control. Total average monthly unique hotel shoppers for the quarter is the sum of the monthly average unique hotel shoppers in a given period.

(15) Revenue per Hotel Shopper. Revenue per hotel shopper is a key performance metric. It is designed to measure how effectively we monetize or convert hot el shoppers into revenue. Revenue per hotel shopper is calculated by dividing total TripAdvisor-branded click-based and transaction revenue by the total average unique monthly hotel shoppers for the period.

(16) Key Business Metrics. We review a number of metrics, including unique visitors, hotel shoppers, and revenue per hotel shoppers, to evaluate our business, measure our performance, identify trends affecting our business, formulate business plans and make strategic decisionts. While these numbers are based on what we believe to be reasonable estimates for the applicable period of measurement, there are inherent challenges in measuring usage and user engagement across our large user base around the world. For example, a single user may have multiple member accounts or browse the internet on multiple browsers or devices, some users may restrict our ability to accurately identify them across visits, and we are not always able to capture user information on all of our platforms. As such, the calculations of our active accurately identify them across visits, and we are not always able to capture user information on all of our platform. Our metrics are also affected by applications that automatically contact our servers for regular updates with no discernible user action involved, and this activity can cause our system to count the users as assuch and ys able to for user information as active users on the day or days such to count at busing our platform. Our metrics are also affected by applications that automatically contact our servers for regular updates with no discernible user action involved, and this activity can cause our system to count the users associated with such applications as active users on the day or days such to count as users of the ergislation estimates published by third parties or from stimilarly-titled matrics presented may be affected as a result of this activity. We regularly review our process and may adjust how we calculate our internal metrics to improve theirs of four similarly-titled metrics of the due to differences in methodology.

* Year to date totals reflect data as reported and is not necessarily a summation of the quarterly data.
